

14 February, 2007

Dear PBAC Chairman:

The Citizen Advisory Group (CAG) will be taking up the topic of conservation as our next subject to study and address. As you will recall, the IDWR Director's order directed CAG to develop recommendations for PBAC with regard to water conservation and recommendations for implementation strategy.

In order to accomplish this task, CAG requests that PBAC provide a description of existing conservation plans/strategies for each entity. A short discussion of the effectiveness of the current strategies is desired; this would include estimates of annual water savings from the entities' and PBAC's perspective. This information will provide CAG with an understanding of the current efforts and will help make our work more effective.

The CAG appreciates PBAC's assistance in this endeavor. We would like to receive the information by April 7. If this date presents difficulty, please let us know. We would welcome PBAC members' participation in this task if there is any interest.

Sincerely,

The Citizens Advisory Group
